s.boltrukevich@gmail.com

Siarhei Bautrukevich, Front-end Engineer

Passionate about mentorship, programming, web, and open source.

Former **Designer**, **Full-stack developer**. Now **Front-end engineer**, with an understanding of fundamentals, fresh standards, and instruments.

Mentor for junior developers or for those who make the first steps on the web.

Employment History

Frontend Developer at Gem4me, Remotely

December 2021 — April 2023

Developed and maintained chat & video/audio calls & video streaming web application using HTML, CSS, and JavaScript.

Worked closely with design team to create visually stunning and user-friendly web interfaces.

Developed and maintained front-end codebases using modern frameworks such as React.

Utilized agile development methodologies and tools such as JIRA.

Collaborated with back-end developers to integrate front-end code with server-side technologies.

Conducted code reviews and provided constructive feedback to team members.

Stayed up-to-date with the latest front-end technologies and best practices.

Mentor at Practicum by Yandex, Remotely

July 2020 — October 2022

I teach students how to find answers to questions, guide them, support them psychologically, help them deal with difficult cases, conduct live coding and q&a webinars on the main topics on the course. I have a lot of positive feedback from them and, in a word, I am high on mentoring in general.

Front-end Developer at Uscreen, Remotely

February 2020 — July 2020

Help in the 'inner kitchen' with Vue 2 (in the admin area for users, also with the new page builder)

Front-end Developer at Uploadcare, Remotely

March 2018 — February 2020

Developed isomorphic Upload API client (works in both browser and node.js), maintained the Uploadcare Widget and helped to "cut" jQuery from it and get rid of legacy code, maintained

the site and docks in React (Gatsby), prescribed a roadmap for frontend development in the whole company and initiated processes to get rid of obsolete and irrelevant code.

Front-end Developer at DOC+, Moscow

March 2017 — March 2018

Developed an Angular front-end at Doc+ (unfortunately, the company closed down about a year ago): a personal account, a doctor booking system, a telemedicine interface

Full-stack Developer at Furious50, Remotely

June 2015 — November 2016

I have done projects ranging from simple websites to developing a task manager for a company.

Education
